

Workshop on Existential Wholeness at Life's End: A Novel Family Dignity Intervention (FDI) for Terminally-ill Patients and their Families

This one-day professional workshop will provide participants with a unique opportunity to experience FDI that is grounded in empirical research. Through role-plays and experience sharing, participants will learn the skills and technique of FDI for facilitating open dialogue between terminal patients and their family carers that promote appreciation and reconciliation, foster relational bonds, and cultivate transcendental wisdoms to be shared across generations through the creation of a family legacy document.
