

The symposium 2019, titled Concerted Efforts in Advance Care Planning: Regional and Local Experiences, hopes to provide a platform for local and regional practitioners, educators, researchers, as well as other related stakeholders in the field to exchange inspiring practice and wisdom on advance care planning (ACP) and community end-of-life care. Local and regional speakers will share their knowledge on developments, promotions, benefits and challenges of ACP, as well as how to facilitate the redefinition of ACP in an inter-disciplinary perspective.
